

Letter #2

15. Nov. 2023

Dear Milton

Sorry for the long delay since my last letter to you. Thank you so much for your letter written on 25.09.2023 which arrived in my ~~office~~ cell on the 29.09, very fast indeed. Then you wrote another letter, and this is a most valuable letter - I have not yet read it - because about a week ago a smiling, then laughing warden informed me that your letter has been held back because of "anti-Israeli" words it had in it. This letter will wait for me with my belongings which I get when I get released from the thought police's detention place where thoughts are checked and controlled in case any deviate from the new global norm. The shorn-alike and bleating-alike human herd of sheeple need to be controlled properly by the Jewish shepherd with his rod of iron.

Test for you Milton: A role play. Pretend you are a medical doctor, now go out on the street and stick your finger up your ass. When people on the street ask you why you have your finger stuck up your ass, tell them with a straight face - without laughing - "to keep the CORONA snakes from sneaking up through the back door. I feel safer with the back door secured." Please report back to me if you succeeded to
